Sequence 595, Application US/10923330
Publication No. US20050153916A1
GENERAL INFORMATION:
BELL INFORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: Beigelman, Leonid
TITLE OF INVENTION: Expression Using Short Interfering RNA (siNA)
FILE REFERENCE: 400/209 (MBHB02-708-C)
CURRENT APPLICATION NUMBER: US/10/923,330
CURRENT FILING DATE: 2004-08-20
PRIOR FILING DATE: 2004-05-24
OTHER INFORMATION: Description of Artificial Sequence: siNA sense region
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gape
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         LOCATION: (21) 7.(21)

GENERAL INFORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: McSwiggen, James
APPLICANT: McSwiggen, James
APPLICANT: Baigelman, Leneid
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Telomerage Gene
TITLE OF INVENTION: RNA Interference Mediated Inhibition of Telomerage Gene
TITLE OF INVENTION: Expression Using Short Interfering RNA (8iNA)
TITLE OF INVENTION: Expression Using Short Interfering RNA (8iNA)
TITLE OF INVENTION: Expression Using Short Interfering RNA (8iNA)

WESULY 2020

SEQUENCE 624, Application US/10923330

Publication No. US20050153916A1

GENERAL INFORMATION:

MESWIGHOLD AND THE PROPERLY SITUED

APPLICANT: Being Therepeutics, Inc.

APPLICANT: Being Properties, Inc.

APPLICANT: Being Properties and Thereference Mediated Inhibition of Telomerase Gene TITLE OF INVENTION: RAY Interference Mediated Inhibition of Telomerase Gene TITLE OF INVENTION: RAPES 100/209

TITLE OF INVENTION: RAPES: 2004-02-0

CURRENT APPLICATION NUMBER: DET/1092/3,330

PRIOR APPLICATION NUMBER: US 60/396,600

PRIOR FILING DATE: 2004-05-24

PRIOR PELING DATE: 2002-07-17

PRIOR PELING DATE: 2004-04-16
